

QUALIFICATION AND CERTIFICATION OF INSTALLERS IN ITALY

Despite the unclear situation of the «Conto Energia», the Italian Feed in Tariff, Certification of PV Installers and Designers has been continued, in anticipation of new forms of incentives for small and innovative systems, where competence of operators is essential

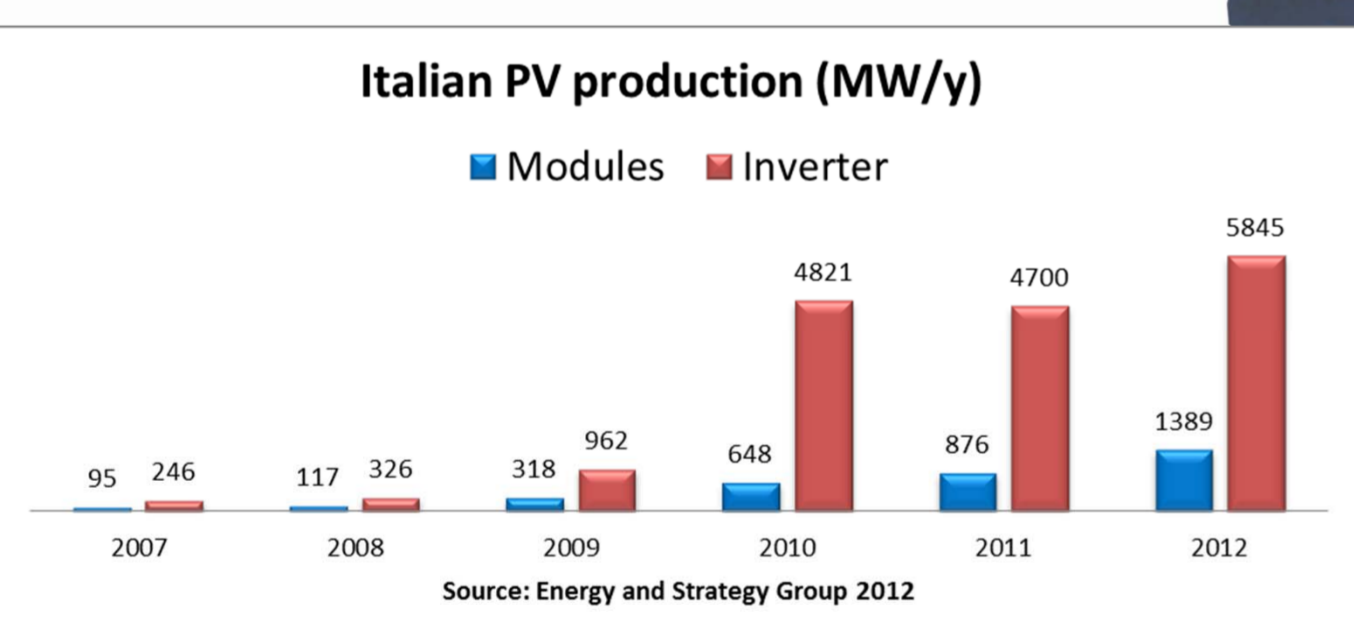

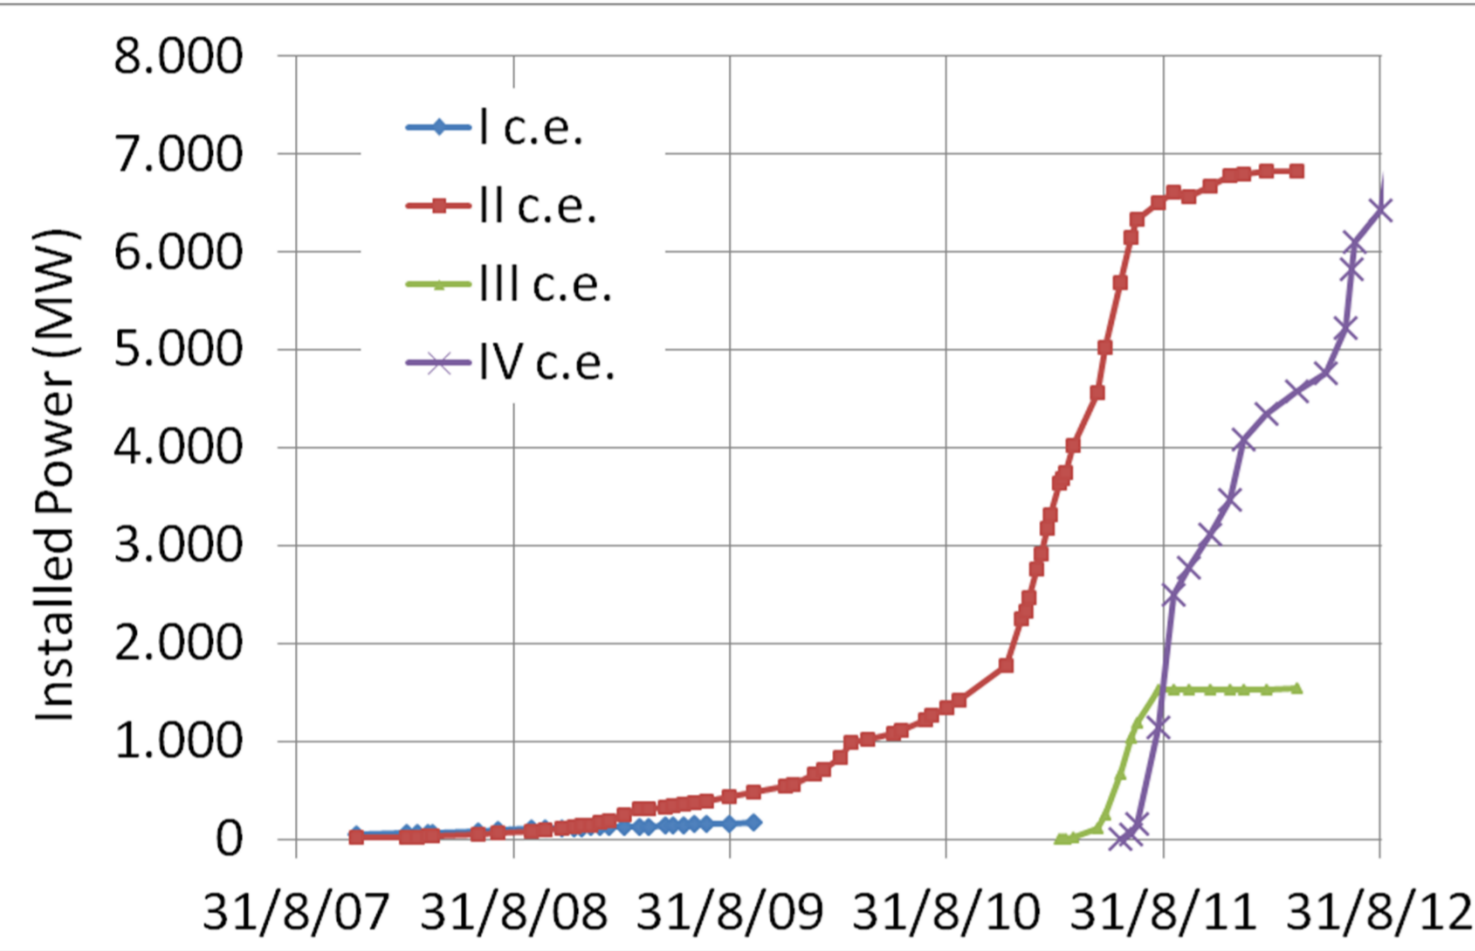

“Conto Energia”

Some achievements:

- 15500 MW cumulative installed PV Power
- About 440 thousand installations
- Budget of 6330 M€ for incentive tariffs.

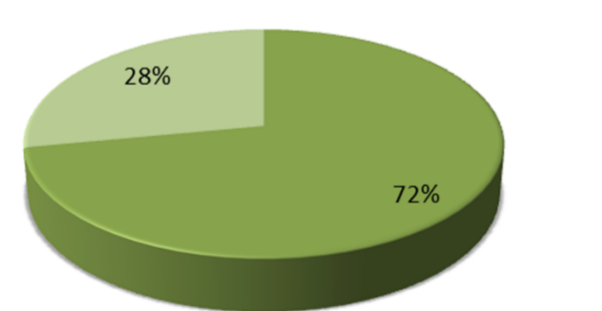

The PV plants have been installed in the framework of the four phases of “Conto Energia” Programme:

- First phase: 5733 plants installed for a total power of about 164 MW.
- Second phase: characterized by the issue of the “Salva Alcoa” decree that has extended the validity of the related tariffs from the end of 2010 to June 2011; this phase resulted in setting in operation about 6812 MW.
- Third phase: from January 2011 to June 2011, a total power of 1550 MW has been installed.
- Fourth phase: around 191800 plants corresponding to 6940 MW have been installed.
